

# FABRICARE MANAGER POINT OF SALE

## BUSINESS MANAGEMENT SOLUTIONS BUILT FOR DRY CLEANERS

Fabricare Manager POS provides all of the capabilities required to manage today's drycleaning businesses. Since 1999, cleaners using this software and computer system have confirmed that it is the perfect choice for controlling cash, inventory, production and so much more. Based on Microsoft Windows and a specially designed touchscreen interface, the system is remarkably reliable, affordable and easy to use.

The Fabricare Manager touchscreen provides an optimum combination of logic and sophistication. Users appreciate the large buttons and uncluttered menus that promote accuracy and efficiency. "Pricing" and "Cash Out" functions can be completed in seconds, as clerks adapt quickly to the minimal number of transaction steps.

In addition to the usual drop-off, invoicing and pickup functions, Fabricare Manager also serves as a state-of-the-art client server system — authorizing the credit cards, printing the heat seal and perma-fiber tags, and compiling customer, inventory and sales details.

Centralized data statistics provide instant insight into processing quality, employee productivity and marketing results. More than 75 different management reports can be accessed and printed with Fabricare Manager's Report Viewer.

Fabricare Manager enhances the protection of customers' credit card data by incorporating End to End Encryption (E2EE) with Tokenization. Credit cards and debit cards are processed securely at the point of sale, while the card data may be kept on file for future billing. Because clear text cardholder data is never touched by the POS, this method enables Fabricare Manager to exceed PCI-DSS compliance requirements. This saves merchants time and money, while assuring customers that cardholder security is a top priority.

Support is something that is taken very seriously by the Fabricare Manager staff. From the initial installation and training to software updates and ongoing maintenance, company experts make sure that the client's drycleaning business continues to run smoothly and profitably.
